FCC-GBG MAILROOM

**Re. Request for modified waiver – DA 15-1457**

Dear Sirs,

In September 2014, we sent to the FCC the enclosed Petition for Waiver. The Commission granted RECCO AB a waiver of Section 90.535(h), subject to certain conditions. One condition was that RECCO AB obtain Equipment authorization for the RECCO transmitter and reflector. This authorization is now being compiled by RECCO AB's TCB (SP Technical Research Institute of Sweden) and will be official and sent to the Commission within the next few days.

A telephone conference was held with the undersigned and Ed Crocella from the NTIA, together with other concerned parties on February 7, 2017. The subject of the conference was RECCO AB's wish to receive an authorization to operate in the US following a blanket license for all rescue organizations/ski areas using detectors instead of site-by-site licences. The discussion ended with all representatives understanding RECCO AB's arguments and giving their consent.

For the foregoing reasons, RECCO AB respectfully requests that the Commission grant this Petition for a modified Waiver DA 15-1457, addressing the criteria in 47 CFR sections 1.925(b)(2) and (3).

In addition to the Petition of Waiver we enclose Form 159 and a list of concerned skiareas/rescue organizations.

Sincerely,

Magnus Granhed  
President
